Meline Engineering Newsletter

Dear Customer,

Meline Engineering Corporation is ringing in the new year with a brand new look to our quarterly newsletter! We hope you enjoy the new format and find the content informative.

Best Wishes this Holiday Season and a Happy New Year!

Welcome to the Team

Tom Santillan is Meline Engineering's newest team member. Tom is a registered EIT and has over 15 years experience in mechanical design.

Tom Santillan, E.I.T.

Tom joined Meline Engineering in 2011 as a mechanical designer and has been an asset to the company ever since. Tom jumped right into projects and is currently the Project Engineer for a 74,500 square foot commercial tenant improvement project.

Please join us in welcoming Tom to the team!

Making News

Meline Engineering promotes continuing education courses for staff and believes in providing all the tools necessary for staff to perform their jobs effectively.

We are proud to announce that in 2011, both Ryan Nelson, P.E. and Marcus Romani, P.E., both received Certified Energy Plans Examiner (CEPE) certification.

Ryan Nelson, P.E.

The CEPE program is administered by the California Association of Building Engineers. The statewide

California, Davis,
Extension Program,
Geothermal Energy
Systems: Overview,
April 14, 2012

program covers topics including training and testing for residential and nonresidential plan checkers, field inspectors and energy consultants. The California Association of Building Engineers describes the CEPE test as "an objective demonstration of a person's technical expertise and application skills for the California Energy Standards."

Marcus Romani, P.E.

Ryan received his certification in residential energy efficiency standards and Marcus received his certification in nonresidential energy efficiency standards.

Along with the new look to our quarterly newsletter, Meline Engineering has added new content to our website. Please visit www.meline.com to view upcoming speaking engagements, new highlighted projects and services provided by Meline Engineering Corporation.

Sincerely,

Natasha Kishkovsky
